

Clarence Jackson Wins Distinguished PEER Fellowship

March 24, 2017. The Langston Lab is delighted to announce that Clarence Leon Jackson II has been awarded a distinguished fellowship by the Program for Excellence and Equity in Research (PEER). This highly competitive award begins with the 2017-2018 academic year, and serves as recognition of Clarence's academic prowess, intellectual zeal and potential for research success. Clarence plans to concentrate his studies in the science of health disparities, using graph-theoretical algorithms, deep learning technologies and the exposome model of human health. PEER seeks to advance a doctoral student's competitiveness and interest in their chosen career field by offering professional development and ambitious research mentoring opportunities. More information about the PEER program can be found here: <http://peer.utk.edu/>. Congratulations go to Clarence for being selected for this well-deserved honor!
