

Cheng Chen Wins Amazon Internship

The Langston Lab is delighted to announce that Cheng Chen has been named an Amazon 2022 Data Scientist Intern. In this role, she will employ her technical strengths in machine learning, high performance computing, combinatorial algorithms, and statistical data processing. A main challenge will be the design of new metrics and methods that have the potential to improve the company's bottom line.

Cheng will gain both leadership training and hands-on experience in large-scale, state-of-the-art business analytics. She will also be given an opportunity to drive analytical improvements, perform risk analyses, and interact with industrial collaborators and stakeholders across organizational boundaries.

Please join us in congratulating Cheng on her receipt of this highly prestigious professional opportunity!
