
1. First slide: Title, with names of presenters

2. Second slide: Questions, which each listener is to answer at the end of the talk
   (a) Provide three questions that focus on main concepts.
   (b) Make sure short answers will suffice.
   (c) Provide the answers, but do not single them out, somewhere in your presentation.

3. Third slide: Bulleted Outline

4. Fourth slide: Overview, including key definitions and a brief discussion of applications

5. Fifth slide: History, including major contributors, interesting stories, main developments and impacts

6. Next few slides: Algorithms, including basic procedures, methodological comparisons, state-of-the-art techniques and example(s) if possible

7. Next slide: Open Issues

8. Final slide: References
